Hold Your Own Plebiscite™

---

Your household, as part of the Warringah district, has been asked to participate in a local plebiscite.

**Should Tony Abbott continue to hold his seat as your local member of parliament?**

Yes  No

---

## Background information

Tony Abbott is your local House of Representatives member for the seat of Warringah. He has been in this position for 23 years.

In that time he has proven himself to play politics quite well even ascending to the Prime Minister's position for 2 years. In this position he is most proud of undoing many things created by the previous government while actually creating nothing of note himself.

At this point in his career he seems keen to fight change, fight modernity and fight the urge to eat another onion on TV.

Recently He has passionately campaigned against the human rights for gay couples while praising Cardinal George Pell, the man who covered up many cases of child sex offences.

He has also been a proud and embarassingly international campaigner for the denial that climate change is happening and has said it is "probably doing good; or at least, more good than harm" as it means less people will die in the winter.

He is clearly a man who chooses to spread misinformation and lies rather than truth and fact. And a man with a loose relationship with reality. An all to familiar and sad problem – as we can see unfolding in America.
